

Soumyadip Singha

Artificial Intelligence & Machine Learning Engineer

Aditya University

About Me :

Ambitious Artificial Intelligence & Machine Learning student passionate about building intelligent, scalable, and automation-driven applications that solve real-world problems. Strong interest in Generative AI, AI Agents, Machine Learning, and AI-powered workflow automation with hands-on experience in developing browser automation systems, intelligent chat applications, and predictive analytics projects.

Skilled in Python, FastAPI, REST APIs, NLP concepts, and modern AI development tools, with the ability to combine software engineering and AI technologies to create practical, user-focused solutions. Continuously exploring emerging technologies such as Large Language Models (LLMs), AI orchestration systems, and intelligent automation frameworks while improving problem-solving, system design, and development skills.

Passionate about innovation, rapid learning, and building impactful AI products that enhance productivity, decision-making, and user experience.

Education :

2016-2020 | (WBBSE) | Secondary (X)

- Chandrakona Road Saradamoyee High School
- CGPA : 7.6/10

2021-2023 (WBCHSE) | Higher Secondary (XII)

- Chandakona Road Saradamoyee High School
- CGPA : 8.2/10

2024-present (Collage)

- Aditya University | Surampalem
- CGPA : 7.8/10

Technologies :

- AI Automation & Intelligent Workflow Systems
- Large Language Models (LLMs) & Prompt Engineering
- Python, FastAPI, REST APIs
- Machine Learning & Predictive Analytics
- NLP, Computer Vision & Data Mining
- Browser Automation & AI-assisted Applications
- MongoDB, Vector-ready Data Handling
- GitHub, Jupyter Notebook, Postman
- AI-driven Problem Solving & System Design
- Intelligent Chatbot Development
- API Integration & AI Tool Orchestration
- Real-time AI-powered Web Applications
- Retrieval-Augmented Generation (RAG) Basics

Projects :

- AI Browser Automation System** – Developed an AI-powered browser automation system capable of understanding user prompts and automatically performing browser-based tasks using intelligent workflow execution and automation logic.
- InsightShelf – Student Engagement Analysis** – Built a machine learning project for analyzing and predicting student engagement using data mining and predictive analytics techniques.
- AI Chatbot** – Created an AI-powered chatbot capable of handling user queries using natural language processing concepts and intelligent response generation.
- Face Recognition & Learning System** – Designed a computer vision-based system capable of recognizing faces and learning new facial data over time using AI concepts.
- Medi-Triage** – Developed a healthcare support platform for symptom analysis and treatment prioritization assistance.

AI Interests :

- Generative AI
- AI Agents & Automation
- Machine Learning
- Natural Language Processing (NLP)
- AI-powered Applications
- Predictive Analytics
- Intelligent Systems
- Real-time AI Applications
- Conversational AI
- AI-driven Web Applications
- Speech Recognition Systems
- Computer Vision & Image Processing
- AI Model Optimization
- AI for Healthcare
- Ethical AI & Responsible AI

Skills :

- Hands-on experience with **Artificial Intelligence, Machine Learning, and AI Automation**, building practical AI-driven applications and intelligent systems.
- Familiar with **Python, Pandas, NumPy, Scikit-learn, and OpenCV** for data analysis, machine learning, and computer vision projects.
- Experience in developing AI-powered applications, **REST APIs, browser automation systems**, and **intelligent workflow solutions**.
- Knowledge of **Natural Language Processing (NLP), Predictive Analytics, and Data Mining** concepts through project-based implementations.
- Actively exploring **Generative AI, AI Agents, and modern AI tools** while continuously improving problem-solving and development skills.

Languages :

Bengali – Native / Mother Tongue
English – Professional Working Proficiency
Japanese – Basic
Telugu – Basic

Strengths :

- Quick learner with strong curiosity for emerging AI technologies
- Problem-solving mindset with practical project-building experience
- Strong adaptability and willingness to learn new tools and frameworks
- Ability to work on real-world AI and automation solutions
- Self-motivated and consistent in improving technical skills
- Good teamwork, communication, and collaboration abilities
